## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species A, drawn to a method of reducing the pattern effect in CMP process comprising performing a first CMP process to remove part of the conductive layer before the barrier layer is polished, thereby a step height of the conductive layer is reduced, depositing a layer of material substantially the same as the conductive layer over the conductive layer, and performing a second CMP process to expose the patterned dielectric layer. It appears that claims 1-8 drawn to species A.
- Species B, drawn to a method of eliminating dishing phenomena after a CMP process comprising performing a first CMP process to an end point of polishing to remove part of the conductive layer wherein the dishing phenomena occur on the conductive layer, depositing a layer of material substantially the same as the conductive layer over the conductive layer, and performing a second CMP process to expose the patterned dielectric layer. It appears that claims 9-14 drawn to species B.
- Species C, drawn to a CMP rework method comprising providing a semiconductor substrate which is reported by a CMP machine as an abnormally polished wafer at a predetermined CMP end point and has a patterned dielectric

layer, a barrier layer over the patterned dielectric layer, and a conductive layer over the barrier layer, depositing a layer of material substantially the same as the conductive layer over the conductive layer, and performing a CMP process to expose the patterned dielectric layer. It appears that claims 9-14 drawn to species C.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanhha Pham whose telephone number is (571) 272-1696. The examiner can normally be reached on Monday and Thursday 9:00AM - 9:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
